

Naturally Tough

Timber Pro™ UV

Deck Precoat Formula

Timber Pro Deck Precoat Formula is a specifically designed, clear natural oil wood finish that provides protection for wood that is too wet or green to coat.

Deck Precoat Formula provides a short term protection from the elements for the wood, as it seasons and dries. Deck Precoat Formula allows the wood to dry more slowly and evenly which reduces checking and cracking associated with wood drying out too quickly. Deck Precoat Formula works on both regular wood decks and pressure treated decks. Once seasoned the Deck Precoat Formula is easily cleaned and recoated with the Deck & Fence Formula.

Features:

Excellent Penetration: Deck Precoat Formula allows for excellent penetration and adhesion to unseasoned wood.

Excellent UV Protection: Deck Precoat Formula protects the wood from the sun's UV rays while it is seasoning.

Excellent Recoated: Deck Precoat Formula can be easily recoated once the wood is seasoned with the Deck & Fence Formula.

Low Odour: the specially formulated Deck Precoat Formula has a very low odour making ideal for interior application.

Easy to apply: Deck Precoat Formula can be easily applied by spray, brush, or paint pad.

Low VOC formula: The low VOC formula of Deck Precoat Formula is better for the environment.

Easy Clean Up: Cleans up with soap and water

Preserves & Protects:

- Unseasoned wood decks including pressure treated
- Unseasoned wood fences including pressure treated
