Timber Pro™ UV

Log & Siding Formula

Timber Pro Log & Siding Formula is a specialized professional grade wood finish used by log home builders, crafters, manufacturers and timber framers in North America.

Timber Pro's long lasting formula has become the product of choice for structures built in harsh climates such as ski lodges & ocean resorts. Serious wood lovers choose Timber Pro Log & Siding formula because it preserves the beauty and integrity of their wood for years to come.

Features:

Excellent UV Protection: Unique UV absorbers and pigments protect the wood from the sun's ultraviolet rays.

Low V.O.C. Formula: Less V.O.C.'s get into the environment.

Unseasoned Wood — No Problem: Log & Siding Formula allows excellent penetration deep into the wood.

Breathable Finish: Will not trap moisture in the wood, reduces rot, reduces checking and warping.

Easy to Apply: Log & Siding Formula can easily be applied by spray, brush or paint pad.

Easy to Maintain: Reapplication of the clear finish will keep the wood surface protected.

Easy Cleanup: Cleans up with soap and water.

Protects & Beautifies:

- Log Homes
- Wood Siding
- Cedar Homes
- Shakes & Shingles
